Clevy Keyboard

Keyguard

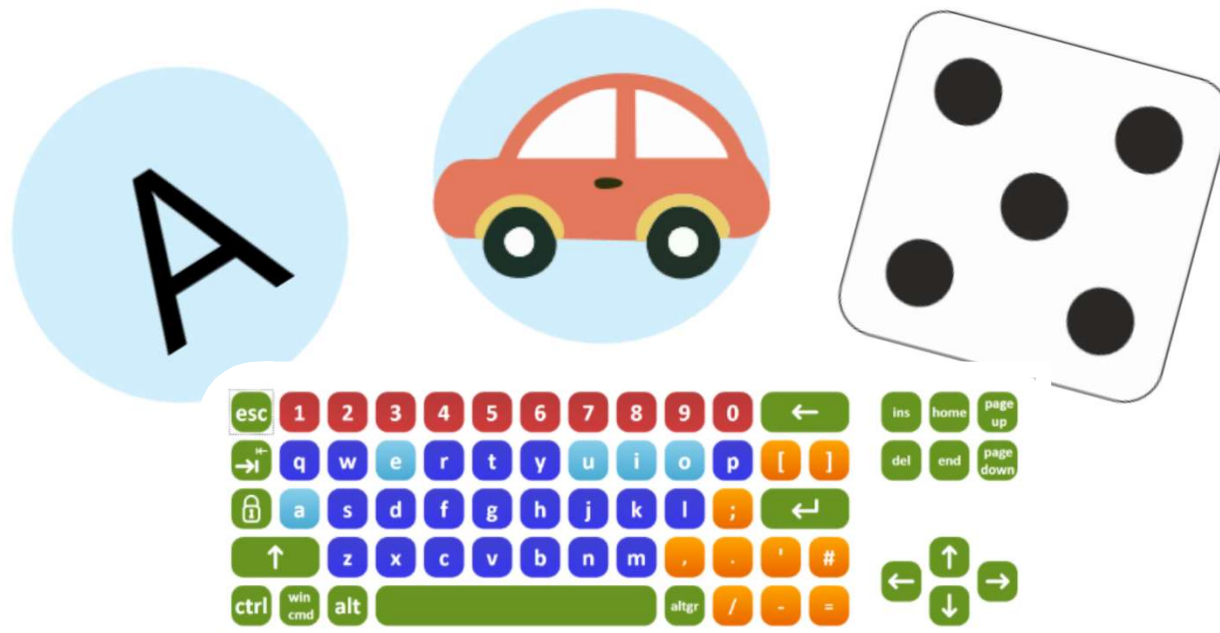

Maestro

Intended for students with special educational needs, but can be used by all students who are learning to write, type, and read

Activities for learning letters, words, numbers and how to use the keyboard

KOKOLINGO

Web app for articulation therapy

- Developed by a team of SLPs and computer scientists
- Croatian, Polish, US English, UK English

Locked-in Syndrome (LIS)

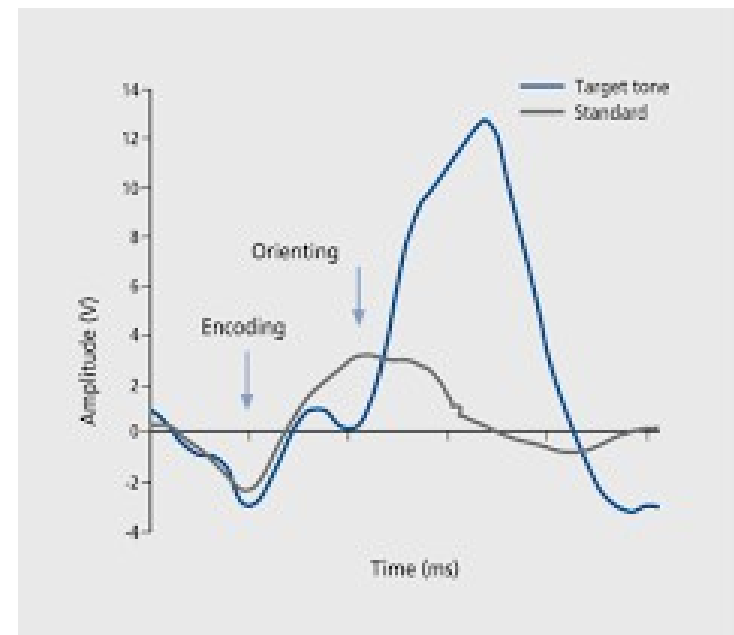

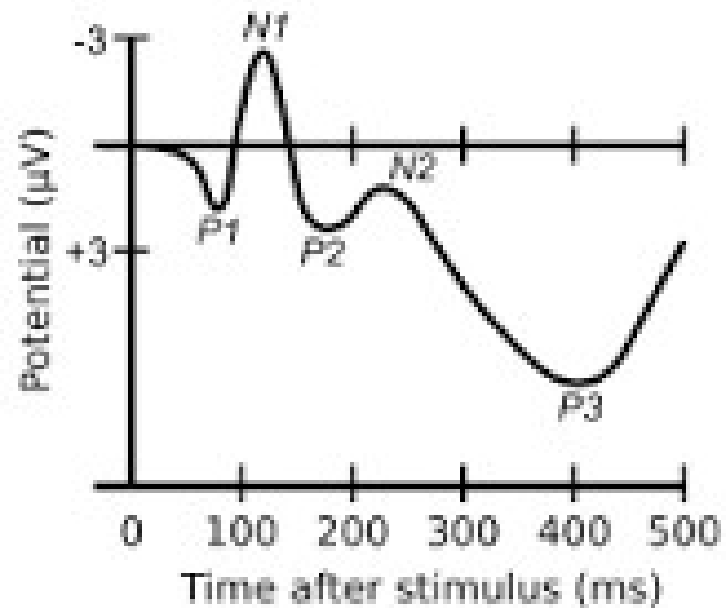

BCI Communicator

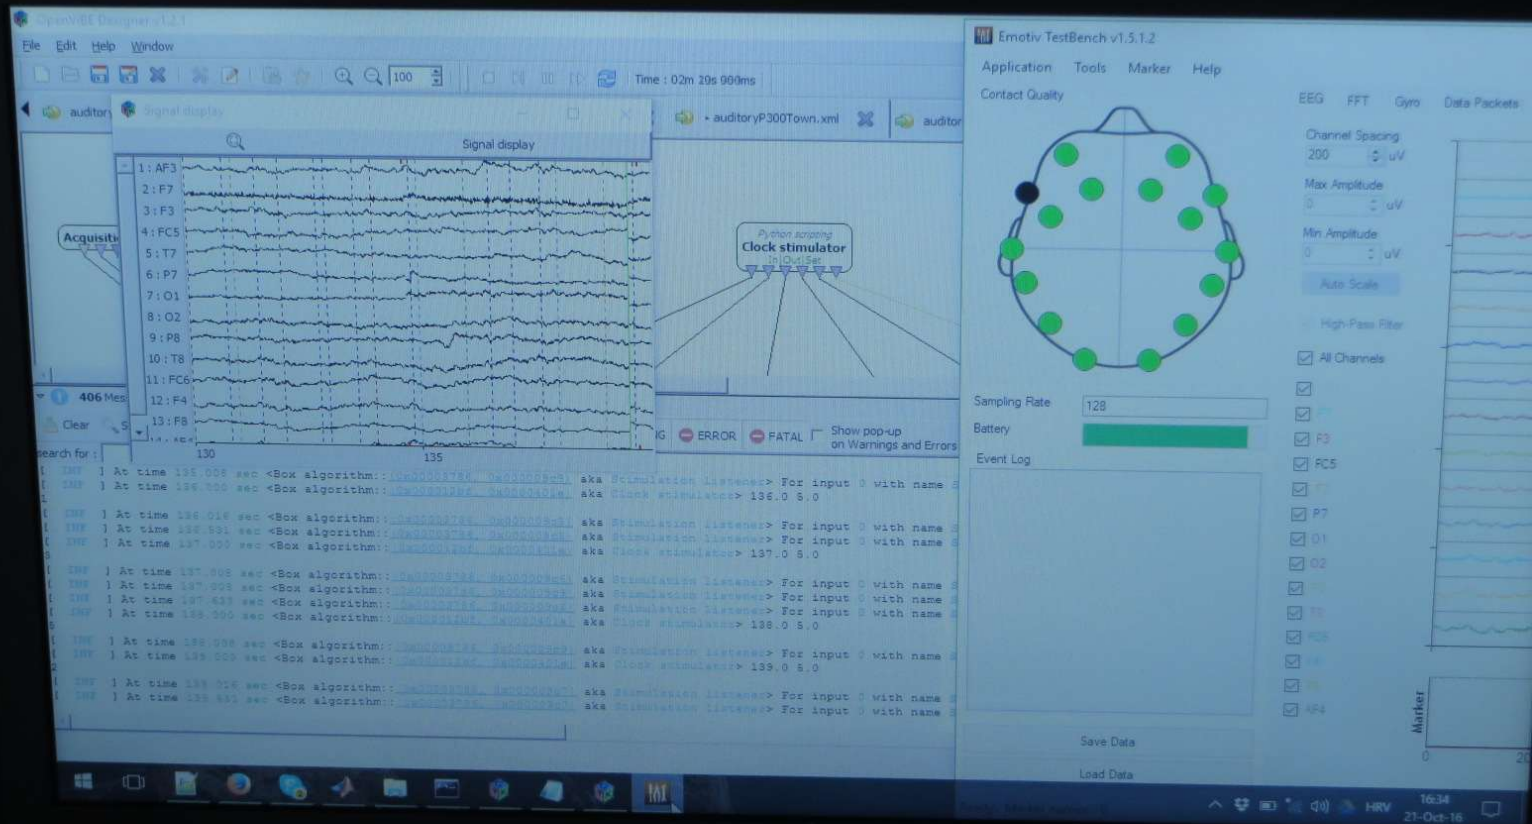

- Communication based on EEG responses to voice prompts
- Simple YES/NO communicator
- introduction of multiple possible answers
- Using the Emotiv EPOC device (wireless 14 channel EEG)

P300 – Event Related Potential

DELL

"Mental spelling" based on auditory stimuli

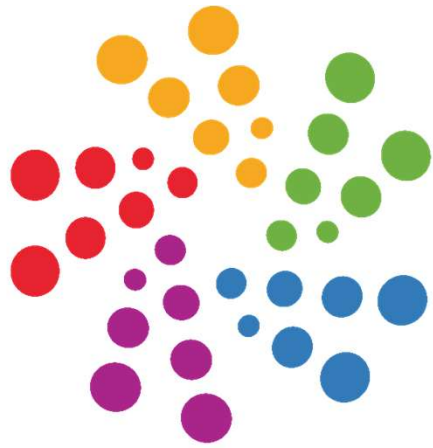

Biomedical Signal Processing and Control

Volume 75, May 2022, 103546

Design considerations for the auditory brain computer interface speller

Ivan Markovinović  , Miroslav Vrankić , Saša Vlahinić , Zoran Šverko 

SENcastle

Imagine a compact sensory room

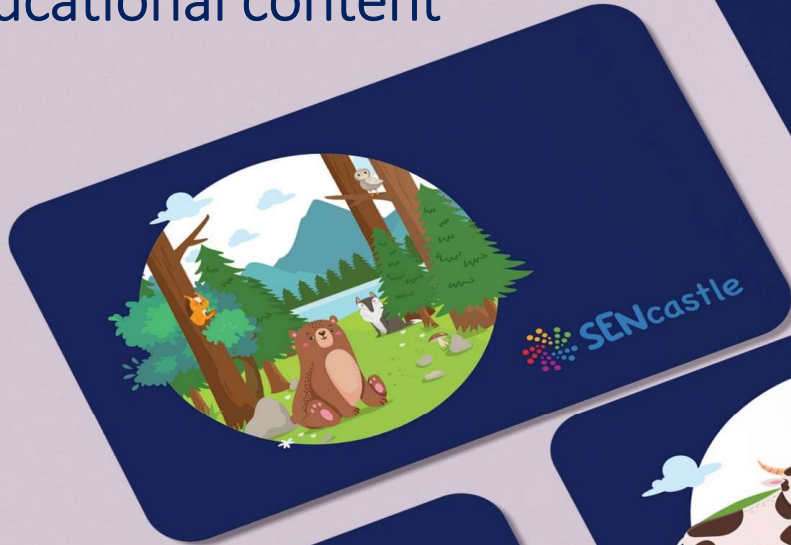

A space that is smaller in size,
Affordable,
Quick installation,
Mobility,
Sensory input for 5 sensory systems.

Used by RFID cards

Educational content

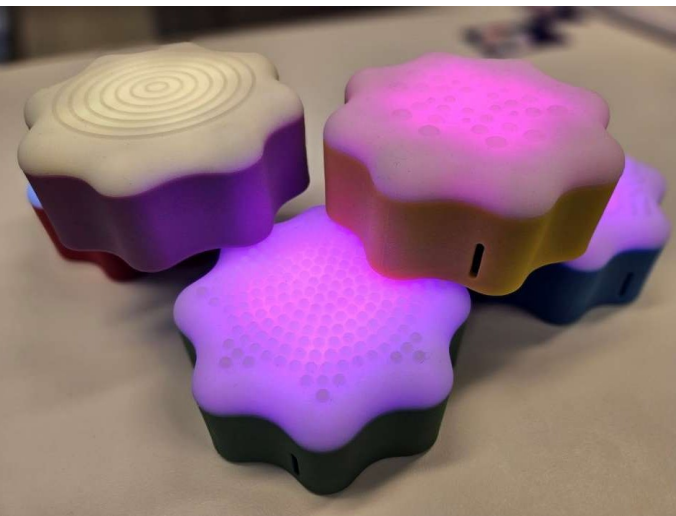

SENspark

- Developed by E-Glas with a team of rehabilitation professionals
- Communication, education, and sensory play

SENspark

- Recording of audio messages
- Augmentative and alternative communication

Thank you!
