3rd Workshop on 5G authorisation processes

Virtual Conference, 17 June 2020

13.30 to 16.30

1.   Introduction by BEREC and RSPG Chairs

2.   Update by the Commission:
developments since the 2nd workshop (21 October 2019)

3.   Topical issues for discussion

This time the exchange should particularly focus on current challenges for the 5G rollout. Participants will get the opportunity to identify and discuss challenges for 5G spectrum awards as well as for the deployment of 5G infrastructures. They are encouraged to exchange views on possible solutions.

a. Progress concerning efforts to take into consideration European citizen's concerns and contribute to a better understanding of issues at stake by the general public (including health-related issues, EMF) at the Member State and EU-level. Exchange of best practices within the Member States on these (including availability / transparency of information).

b. Impact of the Covid19-crisis on the deployment of 5G-infrastructure. Which difficulties do operators face and how can regulators support deployments at the Member State and EU-level?

4.   Wrap up / Conclusions / Follow-up: possible joint papers from RSPG and BEREC
