

Welcome to the World of Standards

WELCOME TO ETSI

Jonas SUNDBORG, ETSI Board Chairman

BEREC Stakeholder Forum Meeting #1, 25 September 2013, Riga, LV

- **Unique meeting place for industry and government agencies**
 - “One table” approach, finding solutions by consensus
 - Responsive to needs of ICT industry

- **Integral part of the regulatory system**
 - Integrated into CEPT & EU policy process
 - Formal links with UN agencies
 - Independent and industry-driven

- **Working with partners around the globe**
 - ETSI standards applied world wide
 - 750+* Members, 62 countries, 5 continents, with direct participation

- **Centre for Testing & Interoperability**
 - Proven track record in ensuring seamless operations across networks, countries & continents

- **We have over 30 000 publications* – available free of charge**

ETSI is a recognized European Standards Organization

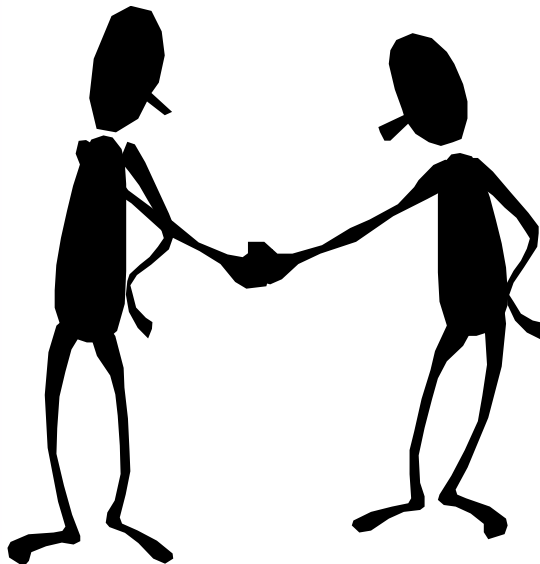

Association of industry players and government bodies...

...manufacturers, network operators, service providers, administrations, users, industry associations, universities, research bodies...

... with direct participation...

... members from all round the world

ETSI standards applied globally!

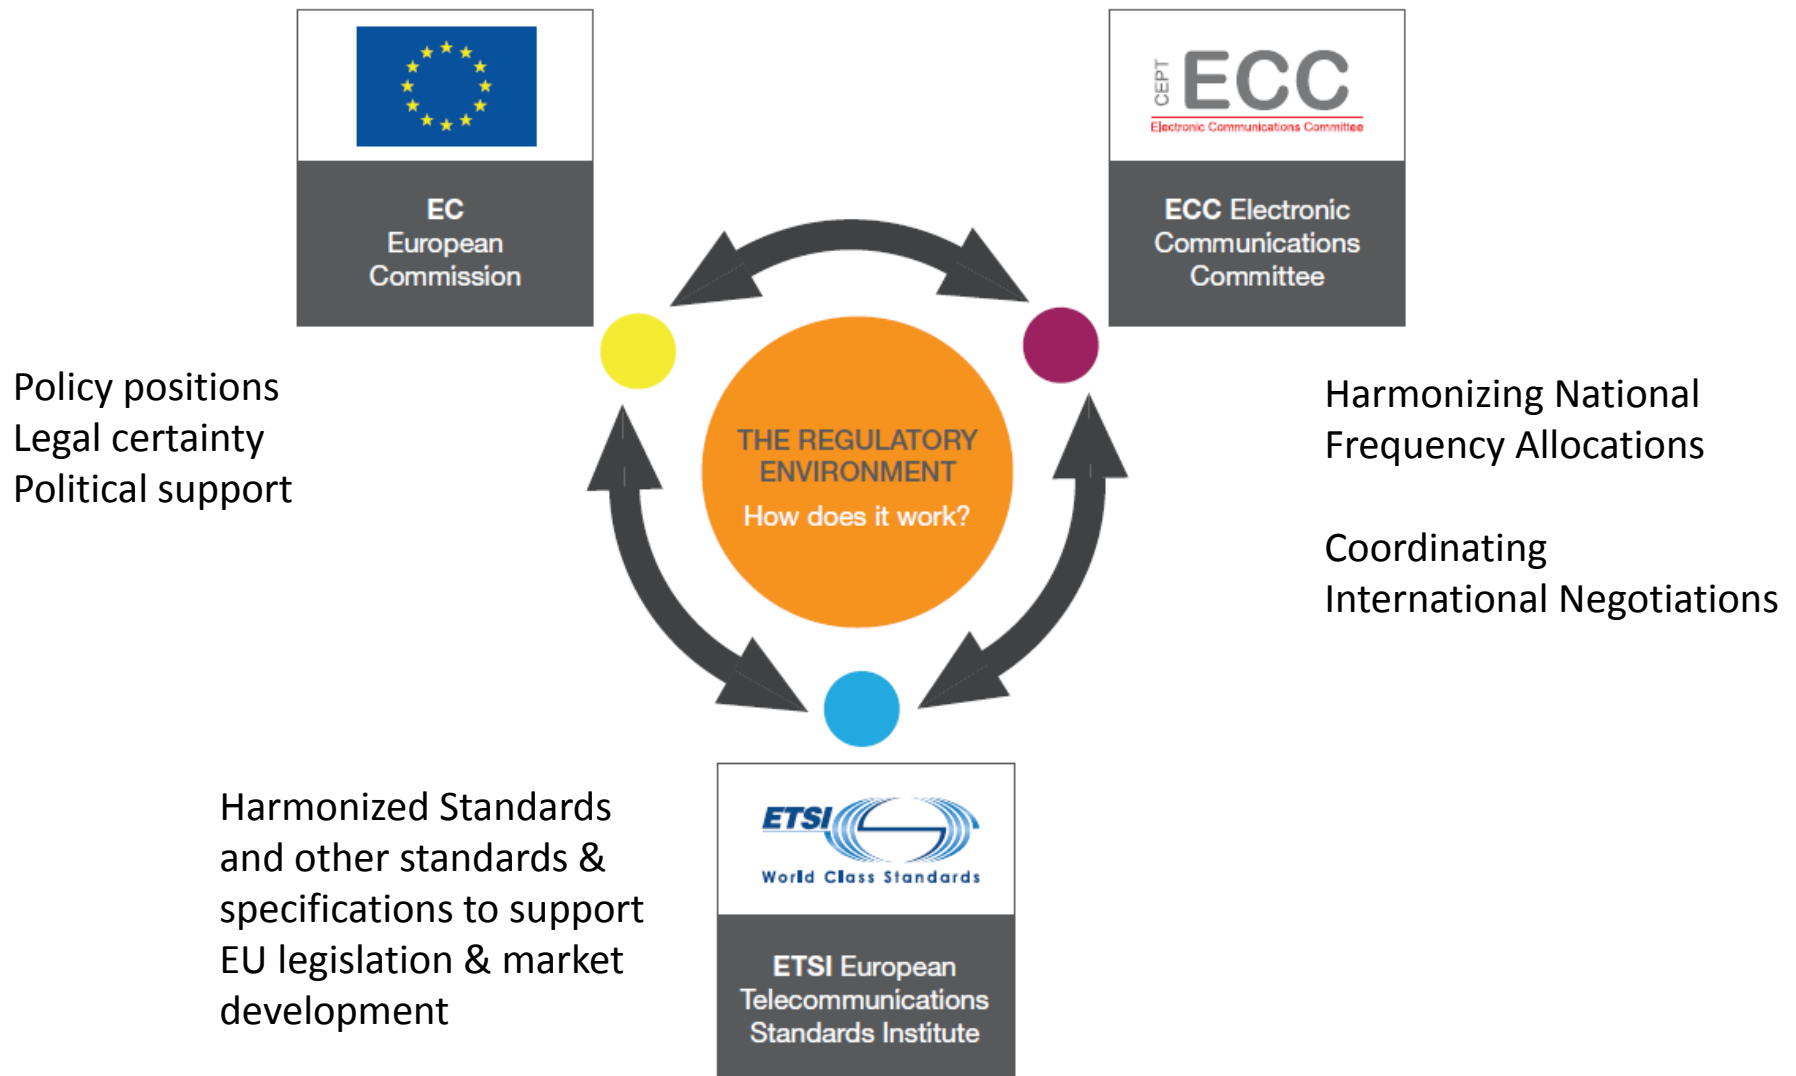

ETSI – a European Standards Organization

- ETSI was conceived in the late 1980s to respond to particular needs in Europe
 - and in support of European policy
- ETSI continues to produce standards for European industry...
- ...and we produce standards and other material to support European Union and European Free Trade Association (EFTA) regulation and legislation...
 - ...for which we are officially recognised at EU/EFTA and governmental levels...
- ...as well as contributing ICT radio frequency requirements to the European co-ordination process

ETSI – Part of the EU Regulatory System

ETSI – a Global Standards Producer

-  ETSI was established as a European body and retains European responsibilities. But...
 - ...many of ETSI's Members are global players...
 - ...so ETSI seeks to have its standards adopted worldwide
 - About 20% of ETSI's Members have no established operations in Europe
 - Many of the other 80% are headquartered outside Europe

Global Standards Collaboration (GTSC, GRSC)

Interregional collaboration on selected standardization subjects between

(International)

- New Memorandum of Understanding July 2012, covers all three ITU sectors
 - Replaces existing separate MoUs with ITU-R & ITU-T (“One ITU”)
- Complementary role of ITU & ETSI
- Iterative approach in developing ITU Recommendations & ETSI standards
- Incorporation of common texts by reference, to avoid duplication
- ETSI is a sector member of ITU-D, ITU-R & ITU-T.

Partnership Projects

Organizational Partners

- 6 Regional standards organizations
(Asia, Europe & North America)

=

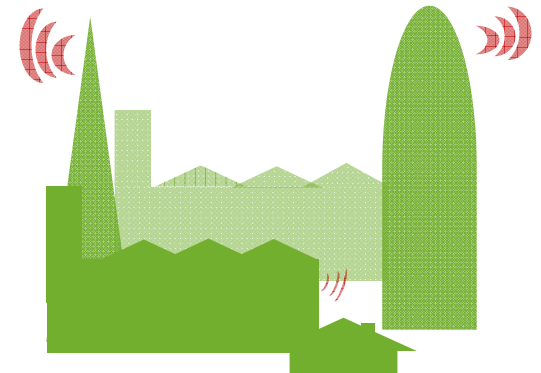

Member Companies

398

Market Representative Partners

- 14 Market partners representing the broader industry

Partnership Projects

oneM2M Partnership Project

271 Participating Partners and Members

A Connected World
