Subject: Public consultation on the draft BEREC Strategy 2026-2030

Dear BEREC,

In page 9 of BoR (25) 80, it is said: "ii) access to civil engineering or physical infrastructure as it remains crucial in some MS **to complement GIA** for VHCN deployment".

This sentence above is not correct.

In fact, in those MS which the sentence intends to be referred, the access to civil engineering (PIA) is the most prevailing form of access, **being the GIA its complement and not the opposite..**

Thus, this sentence has to be corrected.

Thanks for your attention,

A citizen of EU-27
